

ALEX CHEN

SENIOR FULL-STACK & DISTRIBUTED SYSTEMS ENGINEER

alex.chen@example.com • +1 (555) 234-5678 • San Francisco, CA • alexchen.dev • linkedin.com/in/alexchen-eng • github.com/alexchen

PROFESSIONAL SUMMARY

High-impact Senior Software Engineer with 7+ years of experience architecting distributed cloud infrastructure, low-latency microservices, and modern React/TypeScript platforms. Proven track record in scaling systems from 10k to 5M+ daily active users while reducing cloud operating costs.

WORK EXPERIENCE

Lead Platform Architect — *Stripe Technologies* 2021 — Present

- Architected high-throughput payment ingestion pipeline in Go and Kafka, processing 15M+ daily transactions with 99.999% availability.
- Spearheaded multi-region Kubernetes migration across AWS and GCP, decreasing p99 latency by 45% and saving \$380k in annual compute costs.
- Mentored a distributed engineering team of 9, established automated CI/CD benchmarks, and cut release cycle times by 60%.

Senior Full-Stack Engineer — *Uber Technologies* 2018 — 2021

- Engineered real-time driver dispatch matching algorithms serving 250k concurrent requests per second.
- Refactored legacy monolithic services into resilient Go microservices, improving system throughput by 70%.
- Designed and published high-performance internal React component design system adopted by 40+ product teams.

Software Engineer — *Dropbox Inc.* 2016 — 2018

- Built core desktop synchronization sync client in Rust & Python, reducing file conflict rates by 38%.
- Automated continuous integration integration test suites, reducing regression defects by 52%.

EDUCATION

University of California, Berkeley 2012 — 2016

B.S. in Computer Science & Engineering in Distributed Systems & Machine Learning (GPA: 3.91 / 4.0)

SKILLS & COMPETENCIES

Programming Languages: TypeScript, Go (Golang), Rust, Python, SQL, C++

Cloud & Distributed Systems: Kubernetes, Docker, AWS, Google Cloud, Kafka, PostgreSQL, Redis, gRPC, Terraform

Frontend & Web Architecture: React, Next.js, Tailwind CSS, GraphQL, WebSockets, Node.js

KEY PROJECTS

RaftKv Distributed Consensus Engine github.com/alexchen/raft-kv

Open-source distributed key-value store with leader election and linearizable read/write semantics (3.8k+ GitHub Stars).

HyperSync Real-Time Data Pipeline github.com/alexchen/hypersync

Ultra-low latency asynchronous synchronization proxy handling 100k+ concurrent connections with sub-5ms latency.

CERTIFICATIONS

AWS Certified Solutions Architect — Professional — *Amazon Web Services* 2023
